***Species Election***

This application encompasses nine different species of the inventive subject matter as shown respectively in Figures 1, 2, 3, 3A, 3B, 9, 10, 11 and 12. The different species are independent and/or distinct because they constitute alternative apparatus configurations which can be used separately. Pursuant to 35 USC 121, applicants are required for a complete response to (1) elect a single disclosed species and (2) list all claims readable on the elected species including any claims subsequently added (MPEP 809.02(a)).

None of the claims appear to be properly generic to all species.

Applicants are further advised that a mere argument alleging that a generic claim exists or is allowable will not satisfy a species election requirement. For a complete response, applicants must elect a single species and list the claims readable on that species as set forth above. (Note that the large number of claims and species involved makes the present case unsuitable for election by telephone, and hence, applicants have not been offered the option of a telephone election in this instance.)
